“...The all animal cast, in various shades of brown and beige, make this **accessible and appealing to children of all ethnicities**. Key concepts about teamwork are highlighted in spot illustrations with large bold captions, and a set of **thoughtful captions and suggestions** can be used to help kids internalize the message.”

“As a **mother**, I really appreciate the simplicity and use of visuals with your stories. I am also an **Early Childhood Special Education Community Teacher**, which means I provide special education services and consultation services to children in typical preschools, head starts and at home. We use visuals in everything we do to teach children with special needs and also give them lots of opportunities to practice and reinforce them. Often we use the solution kit from CSEFEL.org to teach problem solving but often I feel that if we don't first just teach children how to make a friend and cooperate then problem solving is putting the cart before the horse. **I often feel that we need a supplemental curriculum and I feel like your books would be ideal...**”

“**Have they met my daughter?** Sheesh. As we read “Percy Gets Upset” together, Mini Human #2 (my 4 year old) said, “Mom. Percy is just like me.” Ahhh...yep. Percy gets MAD at things and at people and has a tendency to *react* rather than *respond*. My daughter **asked me to read the Percy book to her three times in a row**, until she had it memorized. Then she went to her father and told him what the book was about. She was quite impressed by the idea that a story had explained her own personality so well....”

Two thumbs up, Mr. Murphy! — *Early Childhood News and Resources*

“...**Murphy has created a cast of characters that every preschool and kindergarten teacher is going to love sharing with their sprouts...**”

There are eight books in the series. Each title introduces a different character, but more importantly, helps to visually teach a specific social skill. The illustrations are colorful and engaging, but the text really helps bring, what can sometimes be abstract, concepts alive for our littlest learners.

Even better (yes, it gets better), Stuart has some amazing [FREE resources on his website](#) you can download and use with the books...”

Love the math books! These new books would be **great openers for discussions about good character traits.**
